REL Department Applicants who Cancelled their Application, Fall 2013 - Spring 2016

This report contains application and enrollment information for students who applied to Master's or Doctoral programs at Baylor from Fall 2013 through Spring 2016, and who cancelled their Baylor application. Subsequent enrollment is defined as enrollment reported by the National Student Clearinghouse, obtained in May of 2016. For applicants who enrolled in multiple terms after cancelling their Baylor application, enrollment is reported as the first record of post-baccalaureate (not undergraduate) level enrollment at a participating institution. Enrollment fields, including primary major, are reported by the institution and may vary in terms of their definition.

Graduate School Report

Admissions and Recruiting

Degree: EDD, PHD, PSYD, DNP, DSCOT, DSCPA, DSCPT, ES, MA, MACC, MBA, ME, MFA, MHA, MIJ, MM, MPH, MPP, MS, MSBME, MSCD, MSECE, MSECO, MSED, MSIS, MSME, MSN, MTA, NDG, DMA, MES, DPT

Major: EDC, BIO, BMS, CHE, CMUS, CUTE, EDP, EEES, ELC, ENG, GEO, HESL, HIS, IS, KENH, MECH, MTH, PHI, PHY, PSC, PSY, REL, SOC, STAT, CPSY, NMID, NUPR, OCTH, EM, ORCL, SURG, ORTH, SPSY, AMS, CMTN, COM, CSD, INTR, JOU, MST, SPA, THEA, ACC, BUAD, EMBA, OMBA, EGR, DIR, HCA, INTJ, COMP, COND, COPI, MUED, MUHL, MUTH, PERF, PPP, CHED, PPA, CSI, EBIO, ENSC, NUTR, BME, ECO, EDA, HESA, HHPR, ONLI, TAX, NMJ, SWO, ENV, EP, SPPE, SMGT, ENT, HESR, PT, NUTN

Total Applications

Below is a figure of Total applications recieved by year from 2014 to 2016. Pay close attention to the ordinate scale since it will almost never start at 0 and scales according to the counts of applications for the respective years. Generally you want to see applications increase every year but expect some cyclical trends that might obscure the true trend. Cyclical trends don't become aparent till we see several cycles.

Offers, Rejections and Cancelled Applications

Below is a figure of offers, rejections and cancelled applications by year from 2014 to 2016. Pay close attention to the ordinate scale since it might start at 0 and end at a relatively high number which can hide serious trends. As your total applications increase don't be surprised to see any or all of these values increase. With large decreases in total applications we might expect that rejections to be affected the most. If we were to test if a large increase in rejections was significant or not we would test the proportions, $\text{rejections}/\text{total applications}$ and not the raw values of rejections. We might expect there to be cyclical trends in any of these groups but typically cyclical trends aren't visible till several cycles.

Accepted and Declined Offers

Below is a figure of accepted and declined offers by year from 2014 to 2016. Pay close attention to the ordinate scale since it might start at 0 and end at a relatively high number which can hide serious trends. As your offers extended increase don't be surprised to see any or all of these values increase. We might expect there to be cyclical trends in any of these groups but typically cyclical trends aren't visible till several cycles.
